You DID it!

Thanks to all OCSEA members and friends who responded to the recent Take Action alert to stop the U.S. Dept. of Labor's efforts to pave the way for privatization of state employment services.

The DOL didn't think it was important that civil service employees, including 250 OCSEA members, provide employment services in the states. **But legislators heard your calls for help and stopped the DOL in their tracks.** Thanks to your efforts, knowledgeable civil service employees will continue to provide these important services.

Stay INVOLVED!

The jobs of these state civil service staff are safe for now...but they could be threatened again as early as this summer.

Members should contact their members of Congress and begin a serious dialogue regarding the necessity of the work they do and the importance of maintaining state civil service employees in this work.
