

HMW 1s and HMW 2s to be reassigned to the new Highway Technician 1 class!

Over 1000 Highway Maintenance Worker 1s and 2s who have a CDL with tanker endorsement and without air brake restriction are about to make the first move into the new Highway Technician 1 classification. DAS is currently reviewing the draft class specs for the HT series. When that is completed, ODOT will reassign HMW 1s and 2s to the HT classification. These people will automatically be reassigned to the HT 1 classification. This reassignment is anticipated to occur before the end of January. All will be reassigned on the same effective date.
