Call now to support the Obama budget.

President Obama's budget heads for big votes in the U.S. House and Senate this week. Pick up the phone right now and tell your member of Congress to support it.

The Obama budget will rearrange America's priorities by focusing on health care and energy independence.

As you can imagine, the special interests are fighting tooth and nail against the Obama budget – the same special interests that drove our economy over a cliff. These special interests failed to kill the budget during key committee votes last week, so they will do everything they can this week as the budget heads for full votes in the House and Senate.

That's why your call is so important. Pick up the phone right now and tell you senator or representative to vote YES on the Obama budget. You can use the script below.

SAMPLE SCRIPT:

Hello, I'm a member of the union AFSCME and I'm calling to asking Senator/ Representative _____ to support the Obama budget this week to get our economy moving again.

President Obama's budget plan fundamentally transforms the priorities of our country. It turns the page on the failed politics of the past and makes a down payment on the new priorities that will revive our economy for the long run – like affordable health care, energy independence and creating new jobs.

Some say President Obama is trying to do too much. But the fact is, he's doing exactly what we elected him to do – bring big change to America that puts regular people first for once.

Can I count on Senator/Representative _____ to vote YES on the Obama budget?
