

On Thursday, Dec. 17, tell Congress:

“Insurance companies want you to fold, but we need you to stay strong!”

Call 1-888-460-0813

In November, the U.S. House of Representatives approved a very strong health care reform bill that lowers costs, improves quality and doesn't tax our health care benefits. But now the insurance companies are working overtime to weaken the Senate version of the bill. The final health care bill – which will be negotiated between the House and Senate – is at stake.

Call 1-888-460-0813 right away. Tell **[REPRESENTATIVE]** you support the House health care bill because it includes a public health insurance option to compete with private insurance companies to drive down costs and keep companies honest. And the House bill pays for reform the right way – by asking people who make over \$500,000 to pay their fair share rather than taxing our health care benefits.

Sample Script

Hello, my name is _____ and I'm calling to tell Representative _____ to stand strong for real health care reform by standing up for the bill passed by the House of Representatives.

We don't need watered down compromises to please the insurance companies. We need real reform that includes the choice of a strong public health insurance option and doesn't tax my health care benefits as income.

Will Representative _____ stand strong for real health care reform?
