

DARK TIMES COULD LIE AHEAD.

Ohio is not alone.

Public employees here and across the nation recently experienced layoffs, and may face even more.

In fact, at least half of all states are facing a budget crisis and are planning additional cuts in health care, education, public safety and aid to local governments. Millions of aging and disabled individuals and children are at risk of losing their health care coverage.

There IS something you can do to stop potential cuts for Ohio.

URGE CONGRESS TO SUPPORT STATE AND LOCAL FISCAL RELIEF

Your support in calling for Congress to provide immediate economic assistance to the states will:

- ✓ **Protect the dollars, programs and services** that keep our families safe and our communities strong.
- ✓ **Prevent painful cuts** to Medicaid, education and other public services that our families and community rely on and that we provide as OCSEA members.
- ✓ **Increase job security** for OCSEA members and other workers who face widespread layoffs due to budget shortfalls.

Contact your senators and representative now!
